

## OPTIMIZES PROVIDER CARE

**REDUCES GAPS IN SUICIDE CARE:** The *Automated Assistant* guides the patient through an evidence-based comprehensive suicide assessment to identify risk, build a crisis stability plan and reduce access to lethal means, ensuring every patient quickly receives recommended care

**INCREASES SUICIDE TRAINING AND CONFIDENCE:** Supports convenient, just-in-time training for staff to learn compassionate, evidence-based suicide protocols so they have the confidence and skills to help their patients in crisis, just like they would for heart attack, stroke or sepsis

**STANDARDIZES CARE DELIVERY AND STREAMLINES WORKFLOW:** Provides consistent, easy-to-use clinical decision support and streamlined workflows to help providers quickly determine optimal, evidence-based care without delays from behavioral health staff who are in high demand and low supply

**DECREASES WORKLOAD AND ENSURES CONTINUITY OF CARE:** Integrates patient self-reported data and provider notes into the EHR (Electronic Health Records) to reduce workload, increase the speed care delivery, and ensure full documentation of every encounter across the health system

**SUPPORTS CARE TRANSITION:** Provides a *Crisis Stability Plan* and *Jaspr At Home* to ensure they have ongoing evidence-based support to help with transitions to least-restrictive alternative settings or home
