

REDUCES HEALTH SYSTEM RISKS AND COSTS

BACKED BY SCIENCE & TRUSTED BY LEADING EXPERTS: Co-designed with suicide science experts, people with lived experience, and leading health systems, Jaspr Health is patient-endorsed, peer-reviewed and rigorously tested

FLEXIBLE AND EASY TO IMPLEMENT: Implementation helps to rapidly achieve and standardize key performance elements to prevent suicide with minimal disruption to workflow and personnel; flexible configuration provides recommended screenings and assessments or matches those already in use

IMPROVES DELIVERY OF RECOMMENDED CARE: In NIH-funded clinical research, Jaspr Health outperformed care-as-usual, demonstrating improved delivery of recommended interventions with reliable access to required, standardized evidence-based protocols

HELPS TO DECREASE DOWNSTREAM COST OF CARE AND AUDITS: Aims to reduce emergency department time and costs associated with behavioral health care - which is typically 4x longer than other emergencies, equating to a loss of \$2,264 per patient - and fees associated with findings in Joint Commissions audits due to improved processes and documentation

PROVIDES CONTINUOUS QUALITY IMPROVEMENT: Monitors all patient and staff engagement electronically, creating accessible online reports and visualization to optimize for quality improvements
